SUMMARY

I began programming as a hobby in 2021 and taught myself Python. After graduating high school, I pursued programming further by enrolling in KITM, where I learned both front-end and back-end web development. During my time at KITM, I gained experience working with various technologies such as React, React Native, Node, SQL and many others. I am passionate about programming and am always eager to learn and expand my skill set.

EXPERIENCE

Full-Stack Developer

MB "Fencas"   **September 2023 - May 2024, Kaunas**

- Developed and optimized an internal website to simplify ordering products from manufacturers.
- Conducted process analysis, system design, and implementation oversight to enhance efficiency.
- Conducted regular performance evaluations and optimizations of the website infrastructure.

Full-Stack Developer

UAB "Eeco"   **April 2023 - June 2023, Kaunas**

- Created a mobile app's look and feel with React Native.
- Developed the backbone of the app using Node.js and Express.js.
- Managed databases with MySQL for smooth data handling.

EDUCATION

Web Developer

Kaunas Information Technology School · 2022-2023

- Graduated with a grade of 9.2/10, won 3rd place in an international web development competition hosted by the school.
